

# Roto-Rooter Spot Repair

## What is spot repair?

Roto-Rooter uses Perma-Liner's durable pipe liner to reline damaged areas of pipe—all without digging! Unlike other lining systems that require relining an entire pipe, Perma-Liner can target and reline specific parts of a pipe.

**Before**

**After**

Spot Repair can fix broken lines without digging, saving lawns and landscaping.

## Cost Effective

Spot repair saves time and money by eliminating digging and fixing only the sections of a line that need to be fixed.

## Eliminate Digging

Why damage an entire lawn to dig up a pipe with only a small area of damage? With spot repair, fixing a damaged line no longer means digging up lawns and landscape.

Roto-Rooter uses Perma-Liner's advanced pipe relining system which uses the highest quality materials and a state of the art process.

## Benefits of spot repair

- No Digging
- Minimal property damage
- No risk of damage to nearby existing pipes
- Reduced downtime during repairs
- 50-year life expectancy
- Non-hazardous materials preserve the environment
- Reline pipe cannot be penetrated by roots
- Five-year guarantee on materials and workmanship
- Bridge missing pipe sections
- Increased flow efficiency
